

RaLaZaBa ELECTRONICS

5th Weekly Report

Team Members: Ali AYDIN, Anıl AYDIN, Enes AYAZ, Nail TOSUN, Selman DİNÇ

Advisor: Lale ALATAN

Done

- We wrote proposal report.
- We searched alternative solution to project.
- We searched for mouse structures(for laser mouse and ball caster mouse) to determine the position of device to decide which choice is better.
- We eliminated the option for the optical mouse structure since the floor where all the operations will occur is not appropriate.

To Do

- We will search about subsystems individually and discuss them.
- After determining the subsystems, we will start working on motion module which will be the first module that we will implement to be able to continue the project
