System complexity

Fun

Knowhow

Done

- All team members joined GitHub.
- We built private repository for project.
- We connected our schedule to determine our working hours.
- We evaluate all project candidates and checked their feasibilities.
- All team members updated their Curriculum Vitae.

To Do

- We will extend our discussion about projects and define objectives.
- We will determine our metrics for objectives.
- We will calculate projects feasibilities with given metrics.
- We will write business statement.
